Apps
Configure and Manage Apps that will be accessible on your devices

Compliance
Customize criteria that define whether or not your devices are compliant

Enrollment
All Policies
Android Enrollment QR Codes

File Sync
Exchange and sync files between your devices and a specified server

Signal
Trigger automated actions based on configured conditions

Device Relocation
Relocate devices into a new group based on the parameters set up

Data Collection
Collect information from your devices by configuring device data points

Alerts
Create rules to get notifications about changes to system, deployment server, and devices

Click “Android Enterprise” to create pollicy for Android devices.

ENROLLMENT POLICY

As of now, only Google, Apple, Windows Modern and Linux policies are visible here. Other platforms will be available soon. To view and manage them, visit the legacy console [here](#).

Enroll devices into MobiControl by setting up an Enrollment Policy

Please Choose *

Google >

Android Enterprise

ChromeOS

Apple >

Windows >

Linux

Printer

Fill in policy name and select “Google Account Type”.

If select “None” user will need to login google account by themselves.###

NEXT

Select “Management Type”.

 **ENROLLMENT POLICY** | Android Enterprise 

 GENERAL — **2** **DEVICE TYPE** —  GROUPS —  SETTINGS

Choose the management type for this Enrollment Policy.

Management Type

☒ **Work Managed**

Focuses on corporate-owned devices used as kiosks, for inventory management, and digital signage. Offers administrator the deepest, granular control over device.

☐ **Work Profile**

Focused on BYOD (Bring Your Own Device) strategy and ensures a clear separation between personal usage of device and work profile, where corporate data resides securely. Offers complete control over work profile but no additional control over rest of the device.

Enroll via Android Management API 

☐ **Corporate Personal**

Focuses on corporate-owned devices also employed for personal use. A combination of Work Managed and Work Profile, it separates work data from personal data. Offers deeper controls to the administrator like Work Managed, however, there are many safeguards to ensure data privacy.

Enroll via Android Management API
