

SOTI

This slides is to show how to set up APP policy.

Click “Apps” and Click “NEW APP POLICY”.

The screenshot shows the SOTI MobiControl WebConsole interface. The left sidebar contains a list of policy categories: Compliance, Enrollment, File Sync, Signal, Device Relocation, Data Collection, Alerts, and Telecom Expense Management. The 'Apps' category is selected and highlighted with a red box. The main content area displays 'App Policies (1 - 8 of 8)' with a table of existing policies. The 'NEW APP POLICY' button is located in the top right corner of the main area and is also highlighted with a red box.

Click “Android Enterprise”.

CREATE APP POLICY

Use an App policy to install Apps on your devices. App policies can only be created for a single family at a time. Some families have additional types.

Please Choose *

Android >

Android Enterprise

Apple >

Windows

Fill in “App Policy Name”.

ADD

Chose which APP need to be installed.

Type in Cipherlab in search bar then download CipherLab OEMConfig and CipherLab ADC Module.

After creating the App Policy, click the policy just created.

The screenshot shows the SOTI MobiControl WebConsole interface. The left sidebar contains a navigation menu with categories like Compliance, Enrollment, File Sync, Signal, Device Relocation, Data Collection, Alerts, and Telecom Expense Management. The main content area displays a table of App Policies. The 'hhytest' policy is highlighted with a red box. A success notification bubble in the top right corner indicates that the 'hhytest' policy was successfully created.
